Summary

PHP Back-End Developer

Experience in web development with a focus on PHP, using frameworks like Laravel and CodeIgniter to build robust and scalable applications.

Developed and maintained systems with MySQL, ensuring performance and data integrity.

Implemented code versioning processes with Git (GitHub/GitLab), including collaborative workflows and branch management (e.g., GitFlow).

Built RESTful APIs, integrated third-party services, and optimized database queries.

Applied best practices (SOLID principles, MVC architecture).

Collaborated on financial integrations with B3, C&M, Itaú, Bradesco, and other institutions.

Led legacy system migrations to modern technologies (PHP 8.2, MySQL 8).

Technologies: PHP, Laravel, CodeIgniter, MySQL, Git (GitHub/GitLab), HTML/CSS, JavaScript (basic).
